Paramount+ Paid Social Analytics

Alessia Berry, May 2026

Understanding the Business Problem of Paramount+

Marketing analysts need to measure the effectiveness of paid social campaigns across siloed data sources for better insights.

Solution Architecture

The **Solution Architecture** for the Paramount+ Paid Social Analytics Pipeline involves a robust tech stack designed for seamless data processing. Data from the Synthetic Meta Ads API is extracted daily and stored in a Snowflake data warehouse. This raw data undergoes transformation via dbt, creating a star schema for efficient analysis. Finally, an interactive Streamlit dashboard delivers real-time insights, enabling marketing analysts to drive informed decision-making and optimize campaign performance across platforms.

Data Sources Overview

5 campaigns, 15 ads, 2700 rows, 90 days, 50 press releases, 26 sources

Meta Ads API

Daily performance data from Facebook and Instagram.

Key Performance Insights

CPA (\$13.19)

Total Spend Overview

Overall spend reached **\$633,348** across 90 days.

Impressions and Engagement

Generated **50.9 million** total impressions from campaigns.

Purchase Conversion Results

Achieved **48,009** new subscriptions through advertising efforts.

ROAS Analysis

The overall **ROAS** is **0.76x**, indicating performance challenges.

Conversion Funnel Breakdown

Notable **drop-off** from clicks to landing page views occurred.

Campaign Performance Insights

Top campaigns show strong **return on ad spend** results.

Diagnostic Analysis

✦ Why retargeting outperforms prospecting:

Retargeting CTR: 2.5 – 5.5% vs
Prospecting CTR: 0.7 – 2.2% – 60% drop-off between clicks and landing page views

✦ Recommendation 1:

Shift 20% of NFL prospecting budget to Win-Back retargeting
→ Expected: 15–20% improvement in overall ROAS

✦ Recommendation 2:

Optimize landing page to reduce 60% click-to-LPV drop-off
→ Expected: 25% increase in conversion rate

✦ Recommendation 3:

Use Taylor Sheridan fans as lookalike seed audience
→ Highest-value audience for subscription conversions
